Carl Joshua Coloma *AI Engineer*

carljoshuamcoloma@gmail.com | +639174504450 LinkedIn GitHub Portfolio

TECHNICAL SKILLS

Programming Languages: Python, JavaScript
Frameworks & Libraries: FastAPI, Streamlit, OpenCV, NumPy, scikit-learn, Pydantic
Generative AI & LLMs: RAG, LangChain, Agentic AI, Prompt Engineering, LLM Integration
AI & Developer Tools: Ollama, Hermes, Exa AI, OpenCode, Git, VS Code, Jupyter, Obsidian, Google Colab
Databases: MySQL & Qdrant

PROFESSIONAL EXPERIENCE

Backend AI Engineer Intern, *FlyRank AI* July 2026 – September 2026
- Participating in a backend AI engineering program focused on developing production-oriented AI systems.
- Working with API development, RAG pipelines, structured outputs, tool-calling workflows, and AI evaluation frameworks.

AI QA Intern, *SoFi AI Tech Solutions Inc.* April 2026 – June 2026
- Conduct evaluation of AI chatbot systems focusing on response accuracy, contextual consistency, and behavioral reliability.
- Design structured test cases for conversational AI to assess prompt handling, edge cases, and model failure scenarios.
- Collaborate with developers to refine AI behavior and improve overall model performance and user interaction quality.

AI Engineer Intern, *Lamina Studios* December 2025 – April 2026
- Built AI models combining computer vision and sensor data to identify risky behaviors and improve operational safety.
- Developed route optimization solutions using mapping APIs and graph algorithms to enhance delivery efficiency.
- Designed a web application integrating predictive analytics and workflow automation using n8n for system processes.

PROJECTS

Powerlift: Precision Pose Estimation for Powerlifting Performance Metrics July 2025
Full Stack-Developer, Document Specialist
- Developed a computer vision mobile application that tracks 17 key points using pose estimation to analyze powerlifting form in real time.
- Provided instant visual feedback and performance metrics, improving training accuracy for 25+ users.

Sunny AI: AI Engineering Learning Platform, *AI Developer* August 2026
- Built a full-stack AI tutor with FastAPI and React that answers questions over a 476-chunk RAG knowledge base spanning 8 roadmap phases, grounding every reply in cited sources with real-time progress and mastery tracking.
- Designed a resilient multi-provider LLM layer (Ollama ↔ Groq) with automatic retry and fallback, and built a zero-dependency RAG evaluation harness scoring a 20-question eval set.

ReSOLVE: Customer Support Automation Platform, *Developer* September 2026
- An AI-powered support platform that triages tickets using intent, priority, and sentiment classification, then routes requests through automated workflows or human escalation.
- Implemented RAG-based response drafting with confidence scoring, guardrails, and deterministic fallback logic to keep the system functional when LLM services are unavailable.

Resume Analyzer, *Developer* February 2026
- Built a Streamlit web application that automatically analyzes 100+ resumes, extracting skills and computing candidate-job match scores.
- Implemented NLP-based entity extraction and skill ranking algorithms to improve resume-job matching.

CERTIFICATES

AI Engineer | IT Specialist - Python | Python Essentials | Artificial Intelligence Fundamentals | Introduction to Data Science | Introduction to Modern AI | Introduction to MCP

AWARDS

Overall Best Thesis - Computer Vision Category December 2025

EDUCATION

Bachelor of Science in Computer Science with Specialization in Software Engineering 2022 – 2026 | P. Paredes St., Sampaloc Manila
FEU Institute of Technology
