Carl Joshua Coloma *AI Engineer*

carljoshuamcoloma@gmail.com | +639174504450 LinkedIn GitHub Portfolio

TECHNICAL SKILLS

Programming & Frameworks: Python, JavaScript, Streamlit,
AI & Machine Learning: LangChain, Transformers, RAG, OpenCV, LLMs, Prompt Engineering, PyTorch, NumPy
Databases & Tools: MySQL, Jupyter, Git, VSCode, Cursor, Claude, Qdrant, Obsidian, OpenCode

PROFESSIONAL EXPERIENCE

Backend AI Engineer Intern, *FlyRank AI* July 2026 – Present
- Selected for a self-paced backend AI engineering program focused on building production-oriented AI systems.
- Curriculum covers API design, RAG pipelines, structured outputs, tool-calling workflows, and evaluation frameworks.

AI QA Intern, *SoFi AI Tech Solutions Inc.* April 2026 – June 2026
- Conduct evaluation of AI chatbot systems focusing on response accuracy, contextual consistency, and behavioral reliability.
- Design structured test cases for conversational AI to assess prompt handling, edge cases, and model failure scenarios.
- Analyze chatbot outputs to identify issues in reasoning, instruction-following, and response quality for system improvement.
- Collaborate with developers to refine AI behavior and improve overall model performance and user interaction quality.

AI Engineer Intern, *Lamina Studios* December 2025 – April 2026
- Built AI models combining computer vision and sensor data to identify risky behaviors and improve operational safety.
- Developed route optimization solutions using mapping APIs and graph algorithms to enhance delivery efficiency.
- Designed a web application integrating predictive analytics and workflow automation using n8n for system processes.

PROJECTS

Powerlift: Precision Pose Estimation for Powerlifting Performance Metrics July 2025
Full Stack-Developer, Document Specialist
- Developed a computer vision mobile application that tracks 17 key points using pose estimation to analyze powerlifting form in real time.
- Provided instant visual feedback and performance metrics, improving training accuracy for 25+ users.

Roadmap Mentor, *AI Developer* Ongoing
- Built a full-stack AI tutor with FastAPI and React that answers questions over a 476-chunk RAG knowledge base spanning 8 roadmap phases, grounding every reply in cited sources with real-time progress and mastery tracking.
- Designed a resilient multi-provider LLM layer (Ollama ↔ Groq) with automatic retry and fallback, and built a zero-dependency RAG evaluation harness scoring a 20-question eval set.

Resume Analyzer, *Developer* February 2026
- Built a Streamlit web application that automatically analyzes 100+ resumes, extracting skills and computing candidate-job match scores.
- Implemented NLP-based entity extraction and skill ranking algorithms to improve resume-job matching.

Document Summarizer, *Developer* March 2026
- Built a Streamlit web application that extracts and summarizes long PDF documents (100+ pages) using NLP and transformer-based models.
- Implemented PDF text extraction, chunking strategy, and Hugging Face transformer pipelines to generate coherent abstractive summaries.

CERTIFICATES

AI Engineer | IT Specialist - Python | Python Essentials | Artificial Intelligence Fundamentals | Introduction to Data Science | Introduction to Modern AI | Introduction to MCP

AWARDS

Overall Best Thesis - Computer Vision Category December 2025

EDUCATION

Bachelor of Science in Computer Science with Specialization in Software Engineering 2022 – 2026 | P. Paredes St., Sampaloc Manila
FEU Institute of Technology
